## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's arguments, see pages 6-8, filed 10/22/2009, with respect to amended claim 15 have been fully considered and are persuasive. The rejection of 9/22/2009 has been withdrawn and notice of allowance is being sent with this action.

### ***Allowable Subject Matter***

2. Claims 1, 4, 6-9, 15, 16, 18-22 are allowed.

3. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 1, the references teach all limitations of claim 1 except receiving a frame at the first switch, the frame having an Ethernet Media Access Control (MAC) header including at least one 6 byte MAC address, the 6 byte MAC address including an address portion which is divided into a plurality of sub-fields, at least two of the sub-fields of the address portion being greater than 2 bits in length and shorter than 5 bytes in length and each sub-field having local significance to a separate switch on the communication network such that each separate switch will read only one of the plurality of sub-fields of the MAC address when making a switching decision for the frame.

Regarding claim 15, the references teach all limitations of claim 15 except setting a local bit in the first octet of the MAC address to indicate to the network elements on the network that the MAC address is locally assigned, the MAC address including an address portion which is divided into a plurality of sub-fields, at least two of the sub-fields of the address portion being greater than 2 bits in length and shorter than 5 bytes in length and each sub-field having local significance to a separate network element on the network such that each separate network

element will read only one of the plurality of sub-fields of the MAC address when making a switching decision for the frame.

This taken with other limitations of dependent claims is considered novel and non-obvious.
